## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments, see Appeal Brief, filed 4/12/10, with respect to claims 1 and 5 have been fully considered and are persuasive. The rejection of claims 1-18 have been withdrawn.

Specifically, on page 11 of the brief, the appellant argues that Schiff teaches a system for syncing the uplink and downlink clocks by using the same transmit and receiving frequencies. As Adiwoso refers to a broadcast television system, it would not make sense to combine a system with the same transmitting and receiving frequencies with a television system wherein the bandwidth being received would be much greater than that being transmitted. The examiner agrees with this reading of the references and therefore the previous rejection is withdrawn.

### ***Allowable Subject Matter***

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance: An additional search of the art has not found a satellite television system that performs common burst synchronization as is required by the claims. As was stated above, the examiner agrees that it would not be proper to combine a different satellite system performing a completely different transmission protocol with the television satellite system disclosed by Adiwoso. Therefore the claims are considered allowable over the cited prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***
